## Extracurricular Activity Eligibility for Students Not Enrolled in St. Odilia School

---

### Policy Statement

Participation in organized, extracurricular activities is limited to registered St. Odilia Students only

### Objective

To allow all interested St. Odilia students the opportunity to participate in extracurricular activities with adequate supervision and leadership.

### Rationale

We are committed to providing a quality education that includes extracurricular enrichment opportunities and organized sport activities. One of the benefits of enrollment in our school is the opportunity to participate in these activities. It is important that we have enough supervision and leadership for these activities relative to the large student participation. Students wanting to participate who are not enrolled in the school have opportunities for enrichment activities and organized sports offered through their city parks and recreation departments.
